Issue: Early Termination of Probation or CIP

Question (from Adams County):

I am looking for examples of Early Termination policy/procedure and templates if any counties are willing to share.

Traditionally, Adams has never permitted early terms but we are now exploring this and I would like examples to share in this discussion.

Lancaster County

Darby, we handle this the same way you describe... "read only" access for these other departments. We do not give access to client case notes/appointments as these frequently contain HIPPA and/or CHRIA protected information. Our notes are considered Court records and so even if an outside entity did a Right to Know or Rule 509 request, they would not get them. I've not had any outside department raise a fuss about this.

Lebanon County

We permit the sentencing Judge to access our records in UCM. No other department is permitted.
